

OVERVIEW

Description

Radius values in design define the curvature or roundness of elements such as buttons, cards, or containers.

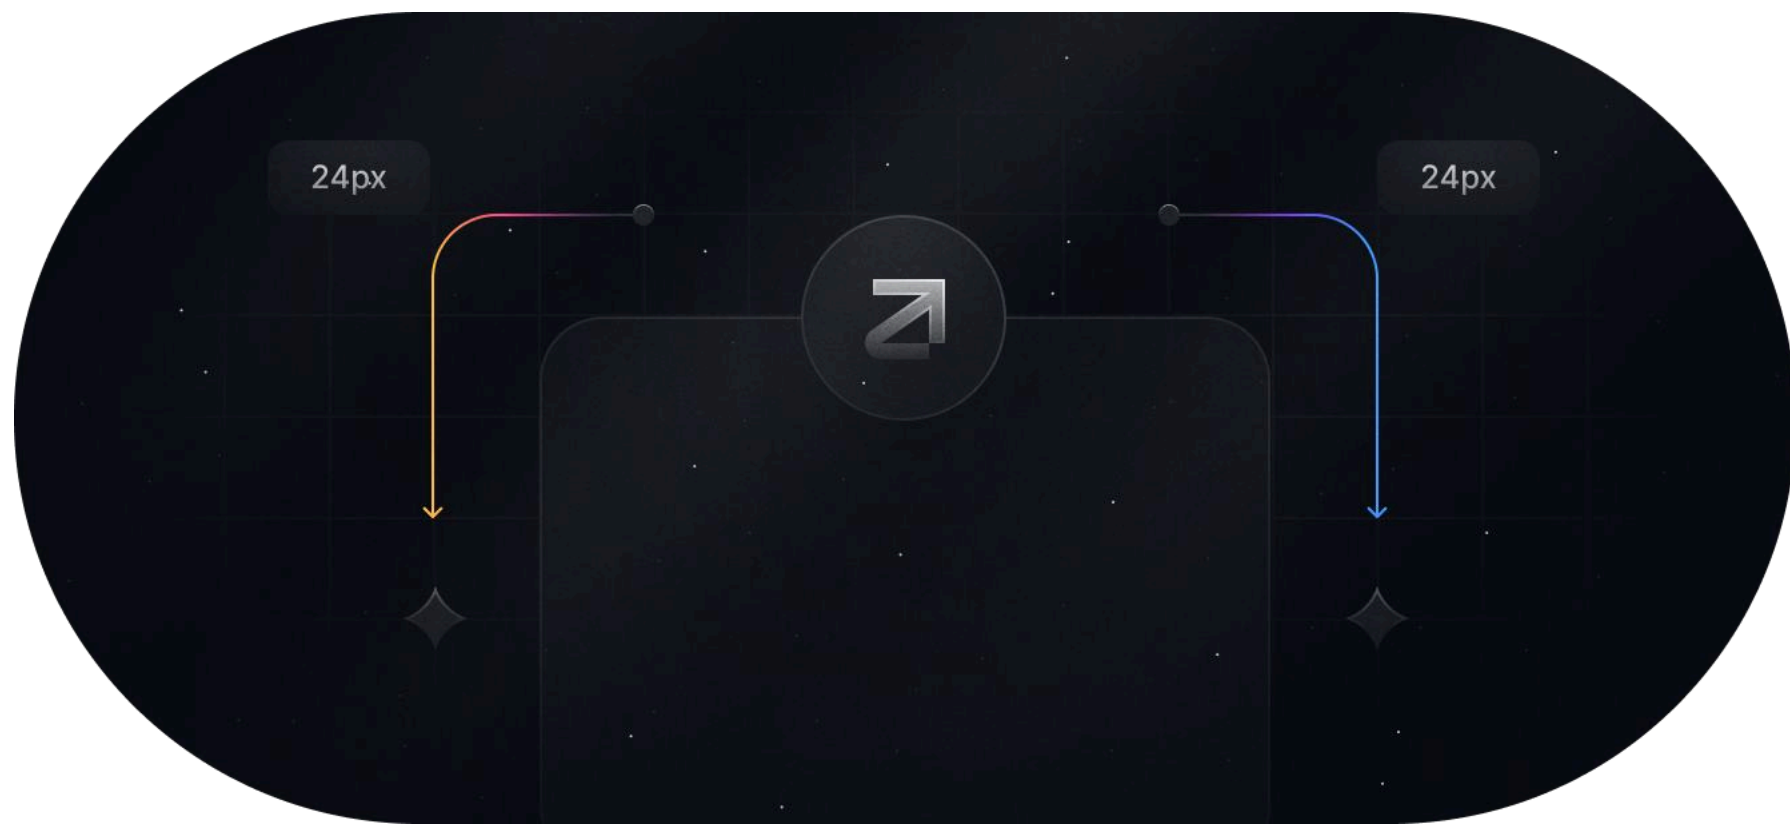

By adjusting radius values, designers can create visual hierarchy, establish a sense of depth, and enhance the overall aesthetic appeal of interfaces. Additionally, radius values influence user perceptions, affecting the perceived friendliness, modernity, and professionalism of a design.

Thus, selecting appropriate radius values is crucial in shaping the overall look and feel of digital products.

FREE COMPONENT

Code Library

Technical features and capabilities of the Corder Radius

Radix UI Integration

Built on Radix UI's accessible primitives

Polymorphic Components

Customizable elements with 'as' prop support

Built with React

Built with modern React architecture

Styled with Tailwind

Built-in animations and responsive styles

Significant Features of Corner Radius

Here's what you need to know about the noteworthy features of Corner Radius element.

Brand Aesthetics

The choice of radius values can play a crucial role in defining a brand's visual identity. Consistently using specific radius values across various design elements can help reinforce brand recognition and establish a distinct visual style that sets the brand apart from competitors.

Space Optimization

Rounded corners can help optimize space within a design by reducing visual clutter and creating a smoother flow between elements. This can be particularly useful in interfaces where space is limited or where a clean and minimalist aesthetic is desired.

Accessibility

Rounded corners can improve accessibility by reducing the risk of sharp edges that may cause discomfort or confusion for users, especially those with visual or cognitive impairments. Carefully chosen radius values contribute to a more inclusive design.

CORNER RADIUS

Corner Radius {radius}

Consistency in design and adherence to the design system's principles are ensured through carefully crafted radius values.

radius-4 4px	radius-6 6px	radius-8 8px	radius-10 10px	radius-12 12px	radius-16 16px	radius-20 20px	radius-24 24px
------------------------	------------------------	------------------------	--------------------------	--------------------------	--------------------------	--------------------------	--------------------------

NAME	PIXELS	CORNER
# radius-0	0px	
# radius-2	2px	
# radius-4	4px	
# radius-6	6px	
# radius-8	8px	
# radius-10	10px	
# radius-12	12px	
# radius-16	16px	
# radius-20	20px	
# radius-24	24px	
# radius-28	28px	
# radius-full	999px
