

OVERVIEW

Description

A pivotal component within our design system, the Dropdown is designed as a list of interactive actions and choices. It offers a vertical layout, as the items are stacked vertically in the list.

It's closely related with the Select, serving as the list that becomes visible when the Select is activated. This integration enhances the user experience and streamlines interactions within the design system.

Significant Features of Dropdown

Here's what you need to know about the noteworthy features of Dropdown component.

Versatile Types

The Dropdown, allowing you to present content in different styles that align with your design needs. Whether it's checkboxes or other elements, you have options.

Rich Content

Add elements like checkboxes, avatars, badges, toggles, and more to the left or right side. You can also use miscellaneous items such as search bars, buttons, or terms and conditions text to enhance functionality.

Highly Customizable

You can easily add both left and right items, whether it's a checkbox, link button, or shortcut. Furthermore, you have the flexibility to edit labels to your liking, all while enjoying the extensive benefits of high customizability.

COMPONENTS

Dropdown Items

Offering interactive options, information, or actions that users can engage with.

COMPONENTS

Dropdown Misc. Items

Miscellaneous elements within the Dropdown, that enhance functionality and interaction.
