

OVERVIEW

Description

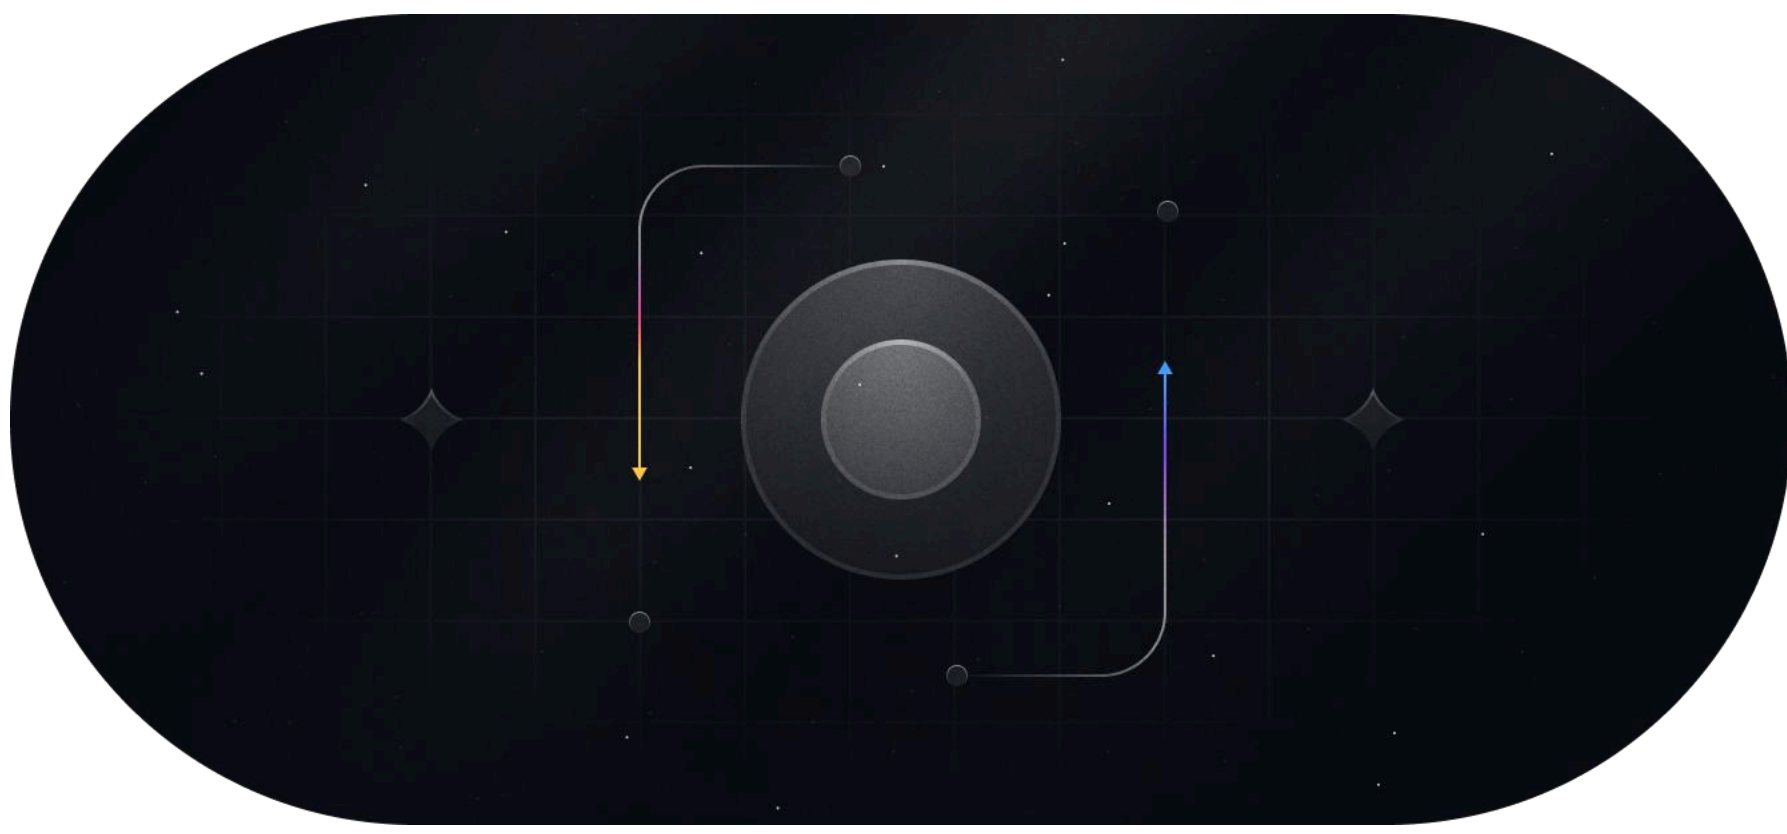

The Radio Button holds significance as it enables users to make a single selection from a set of options. Its unique feature ensures that only one option can be chosen at a time, providing a clear and intuitive choice mechanism. While radio buttons and checkboxes may appear similar, the key distinction lies in radio buttons permit only a single choice, whereas checkboxes allowing multiple selections.

In our design system, we have enhanced radio buttons with labels and cards, offering enhanced diversity and versatility for your design projects.
