

OVERVIEW

Description

The Slider and Range Slider components provide dynamic and interactive ways for users to input numerical values or select a range within a specified range. As an additional feature, tooltips are integrated to visually indicate the selected values, enhancing precision and user understanding.

The Slider allows single-value selection by sliding along a track, while the Range Slider extends this functionality to choose a range between two values. Both components offer a visually intuitive and customizable interface, contributing to an enhanced user experience, especially in applications where precise numeric input or range selection is crucial.
