

OVERVIEW

Description

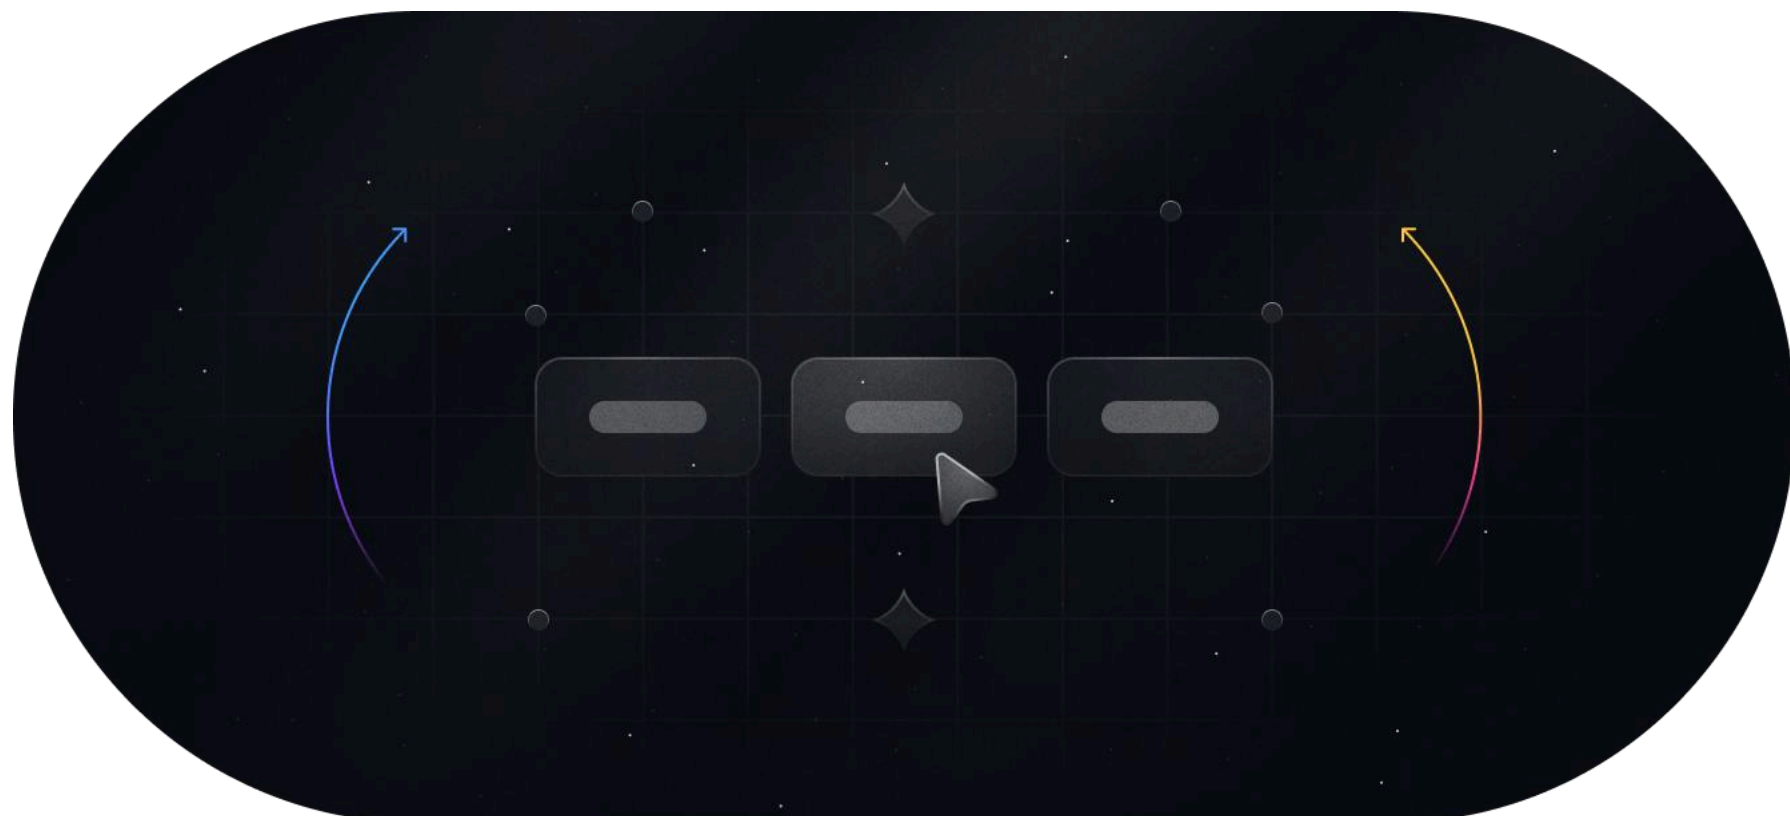

The Tab Menu component is a versatile and interactive tool for organizing and navigating content within your application. Users can easily switch between tabs to access different sections or categories, enhancing the accessibility and organization of content within your interface.

In our design system, we offer two types: horizontal and vertical, allowing you to choose the most suitable layout for your design. With horizontal tabs, you can present content in a linear fashion, while vertical tabs provide a stacked presentation.

Significant Features of Tab Menu

Here's what you need to know about the noteworthy features of Tab Menu component.

Streamlined Horizontal Navigation

The Horizontal Tab Menu provides a clear and linear layout for navigating content horizontally. It simplifies the user experience, allowing seamless browsing through different sections or categories.

Stacked Vertical Navigation

The Vertical Tab Menu offers a stacked layout for efficient content navigation in a vertical arrangement. Users can effortlessly explore diverse sections or categories.

High Customizability

Our Tab Menus offer high customizability, allowing you to personalize the menu items with varying states and quantity options. You can easily add or omit tabs to suit your design and content needs.

COMPONENTS

Tab Menu Horizontal

Provides a linear layout for making it easy to switch between sections or categories.

COMPONENTS

Tab Menu Horizontal Items

Items with states to be used in the Tab Menu Horizontal component.

COMPONENTS

Tab Menu Vertical

Provides a stacked layout for making it easy to switch between sections or categories.

COMPONENTS

Tab Menu Vertical Items

Items with states to be used in the Tab Menu Vertical component.
