OVERVIEW

Description

Buttons are foundational elements within user interfaces, facilitating user interaction and navigation in digital experiences. In a design system, they are essential since they serve as intuitive tools for guiding users through actions such as form submissions, page transitions, or interactive responses.

Within the button category, our design system offers variations like link buttons, which blend with text content, and social buttons, enabling users to login and register easily, and more like compact and fancy buttons.

Significant Features of Buttons

Here's what you need to know about the noteworthy features of Button base components.

Variety of Buttons

Our design system offers a diverse range of buttons, including regular, link, social, and more, ensuring that you have the right button for every context and need.

High Customizability

You can choose from a wide range of variants, styles such as lighter, stroke and size options to cater to various design requirements.

Interactive States

Button states include hover effects, focus states, and disabled states, ensuring that your interface responds intuitively to user interactions.

COMPONENTS

Buttons

Fundamental interactive elements that guide user actions within digital interfaces.

COMPONENTS

Link Buttons

Buttons that seamlessly integrate with text content.

COMPONENTS

Social Buttons

Simplify user login and registration processes.

COMPONENTS

Fancy Buttons

Regular buttons with a fancy appearance.

COMPONENTS

Compact Button

Buttons that are ideal for when space is limited.
