

OVERVIEW

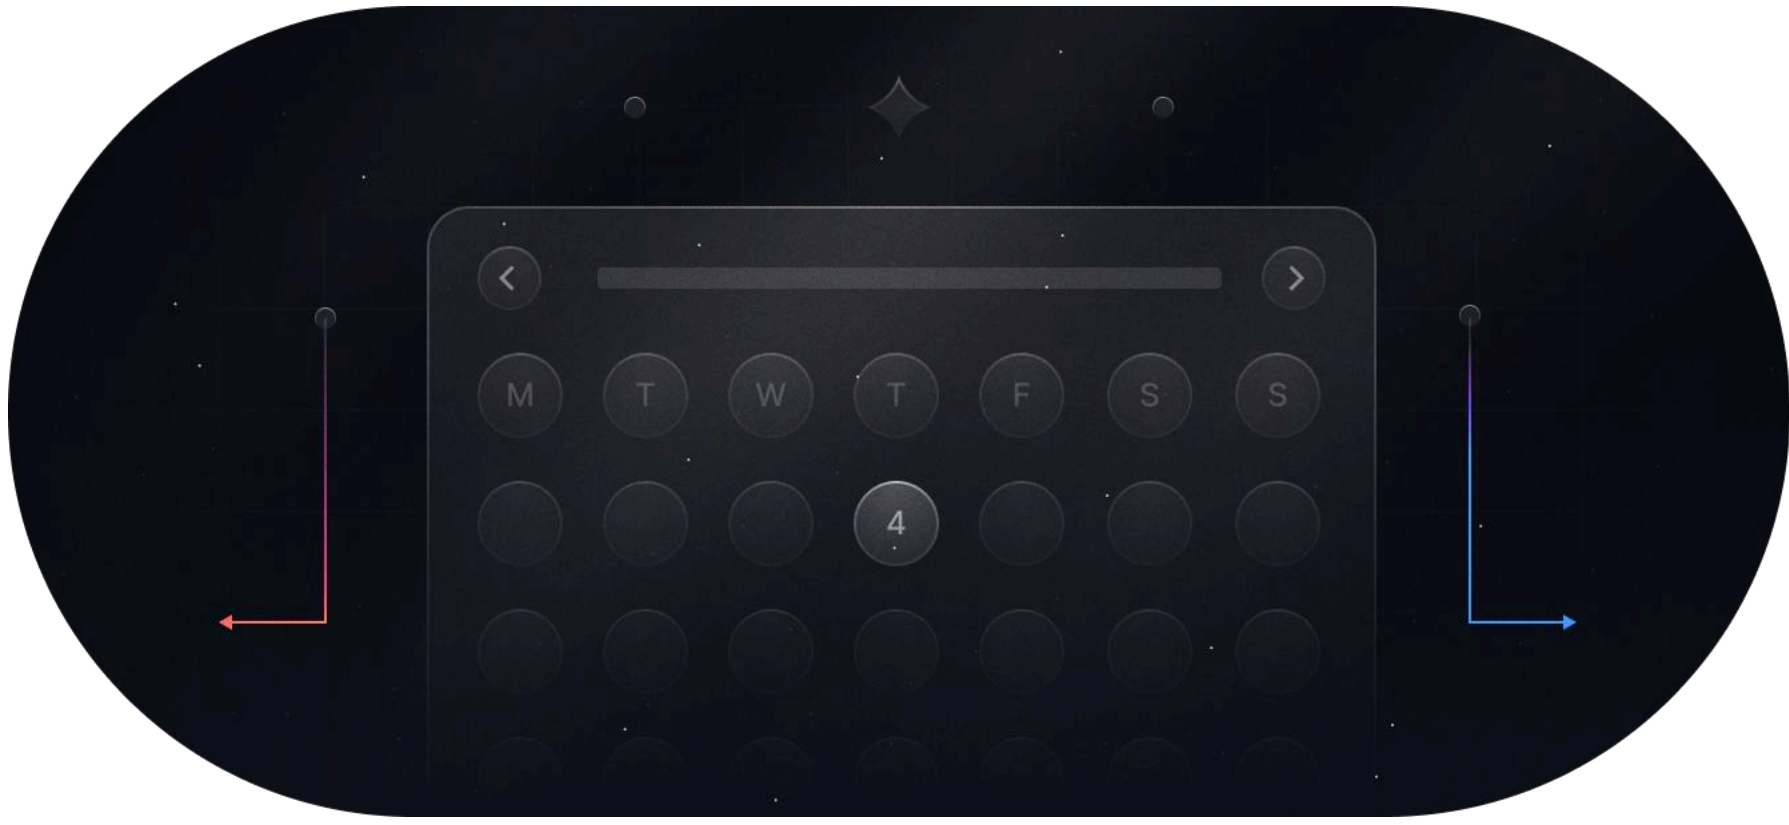

Description

The Date Picker component is a crucial element within our design system, serving as a fundamental tool for users to select dates. Also, we recognize the importance of providing a comprehensive solution for date-related interactions, which is why we have included not only the Date Picker but also the Range Picker, filters, and various other features, ensuring that our design system covers a wide range of date selection and filtering needs for your projects.

Significant Features of Date Picker

Here's what you need to know about the noteworthy features of Date Picker component.

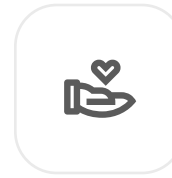

Date & Range Pickers

Offers versatile date selection options. With the regular Date Picker, you can easily pick single dates and the Range Picker allows you to select date ranges efficiently, making it ideal for a variety of date-related tasks.

Time Filter & Footer Options

The Date Picker component is enhanced with Time Filter and Footer options, making it even more functional. They enable precise date-time filtering and provide additional information and interactive elements below.

High Customizability

Day Cells offer numerous states and options, allowing you to create a date picker that aligns perfectly with your design vision. From highlighting special dates to adjusting the appearance of each day cell, you have the flexibility.

COMPONENTS

Day Label & Cells

Minor components used to emphasize days and dates, enhancing the main component.

COMPONENTS

Period Range & Date Selector

Offering left-side filters and displaying specific times at the top, completing the main component.

COMPONENTS

Date & Range Pickers

Enabling users to choose either a single date or a range of dates, equipped with the footer section.
