

OVERVIEW

Description

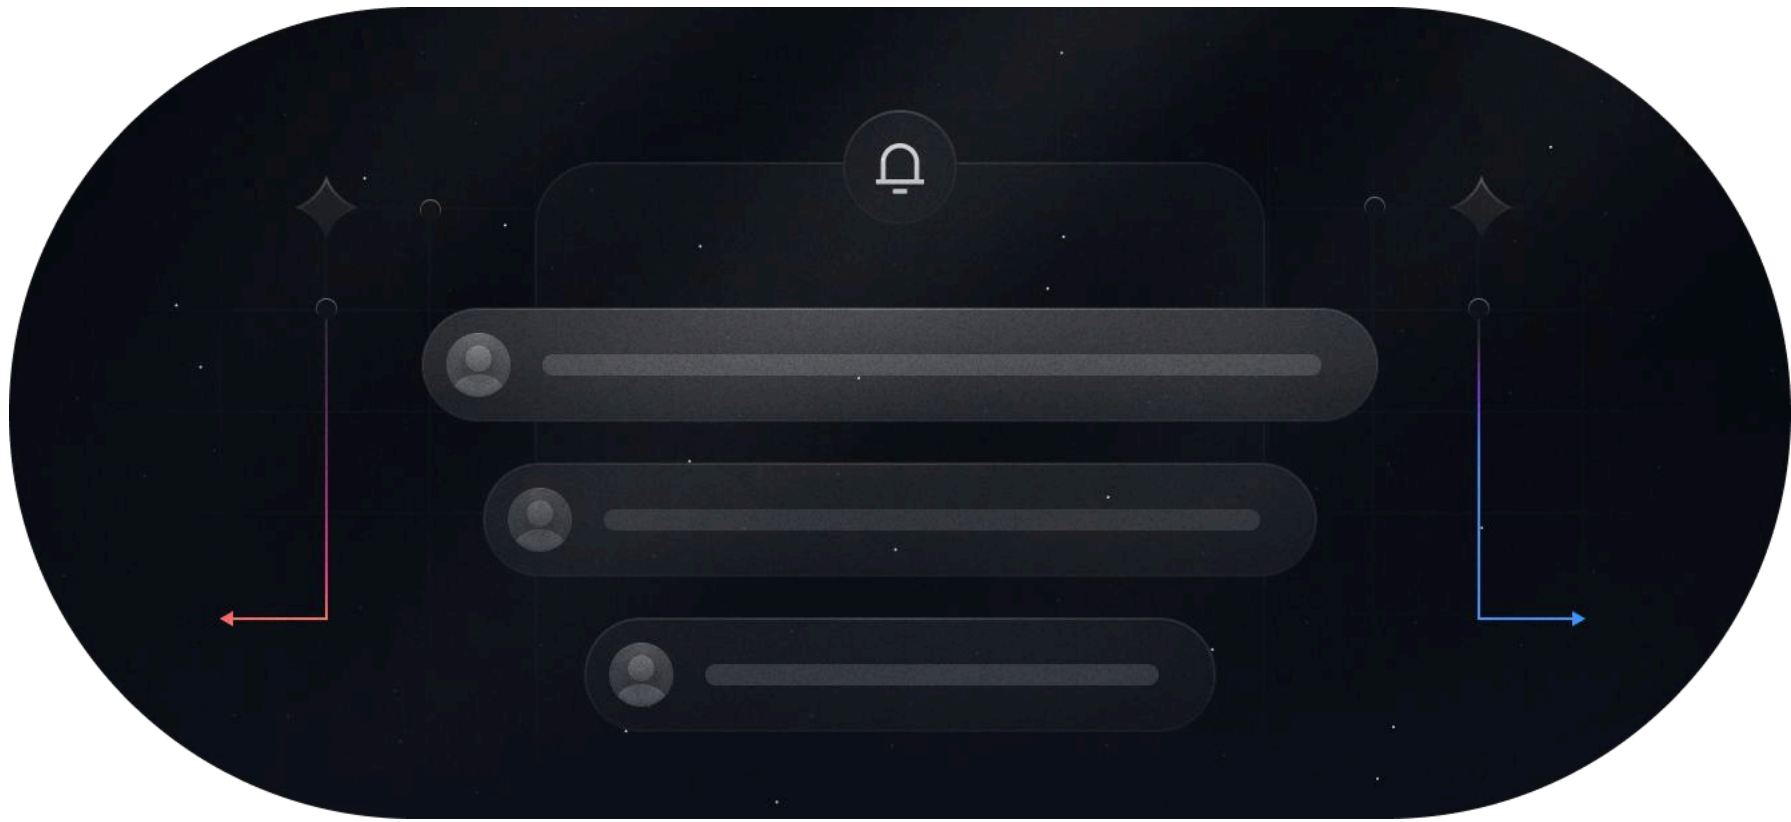

The Notifications component is a component within a design system where users' activities on a specific platform are displayed chronologically. It is commonly found in various platforms such as social media platforms, online communities, collaboration tools, and applications.

The Notifications enables users to track activities happening on the platform, interact with other users, and engage more deeply with the platform. It serves to strengthen the social and functional structure of a design system by facilitating users in staying updated with platform events, fostering interactions with other users, and enhancing their overall engagement.
