

OVERVIEW

Description

The Progress Bar, a fundamental element of our design system, visually communicates the status and completion progress of tasks and processes. With its sleek and intuitive design, it enhances user experiences by providing clear and real-time feedback on ongoing operations, ensuring a smooth and engaging interface for your projects.

We also have a Circular Progress Bar, which is a circle-shaped progress indicator, and a Progress Bar Label that shows extra details like the percentage, title, and description. These options give you the flexibility to display progress in various ways, making it easier to create user-friendly interfaces for your projects.
