

OVERVIEW

Description

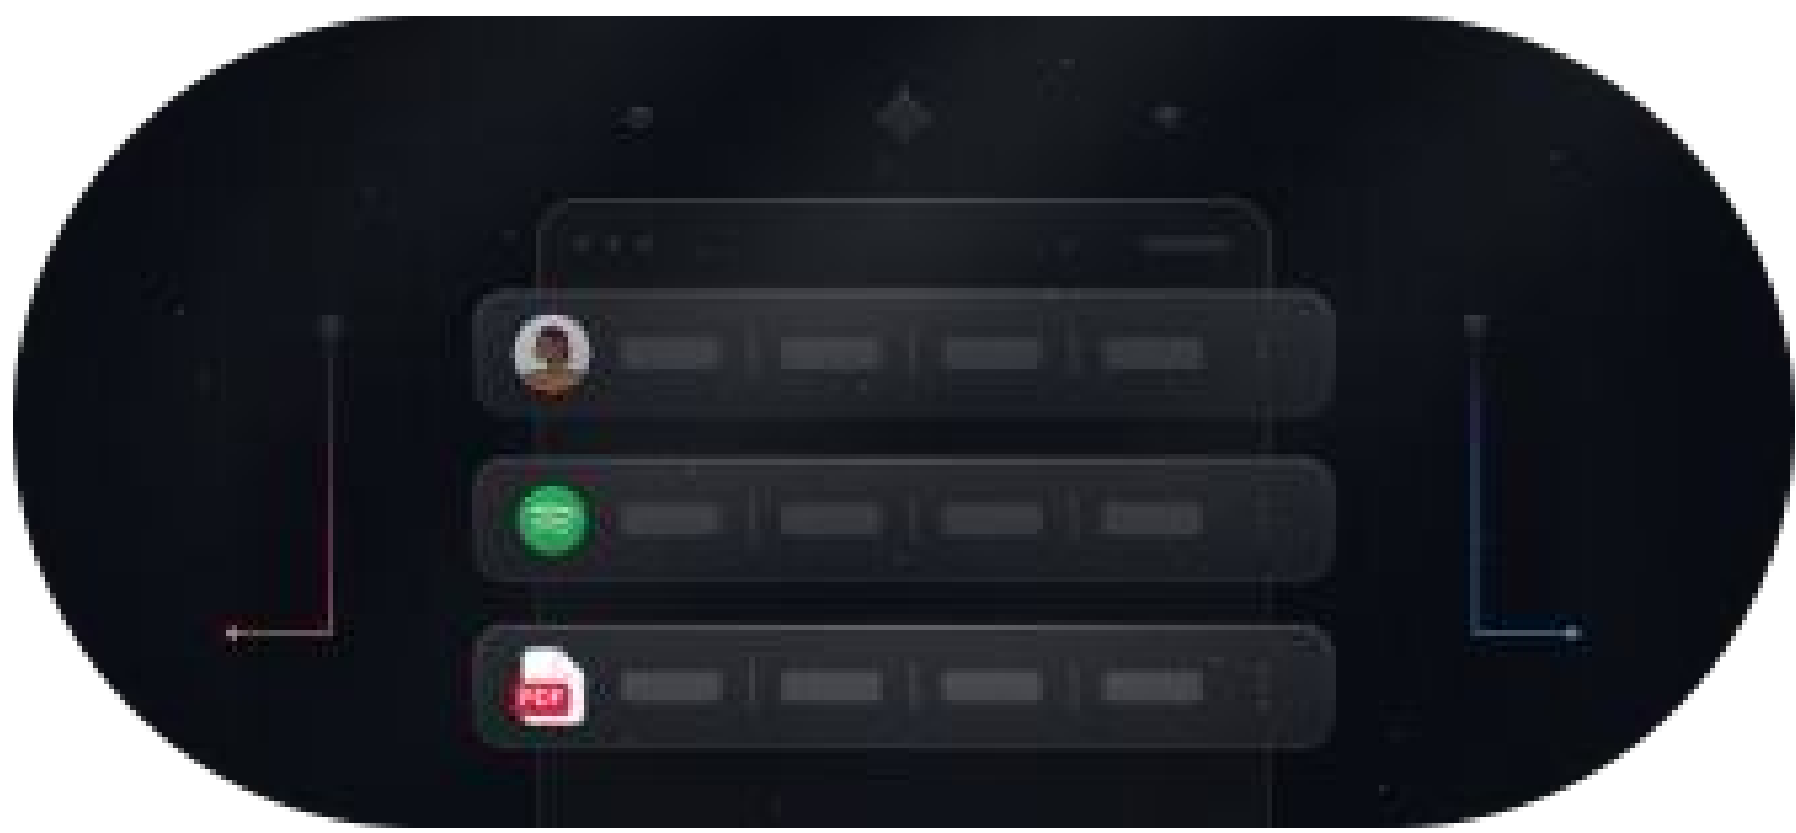

The Table component serves as a fundamental element in data presentation, offering a structured and organized way to display information. We've designed this component dividing it into two essential parts: the Table Row Cell and Header Cell.

The Table Row Cell is highly versatile, with numerous options to address diversity in content presentation. It allows users to display data in a format that suits their specific needs. The Header Cell enhances the clarity of your tables, aiding users in understanding the content organization. Together, these components empower you to create tables that effectively convey information and more.

Significant Features of Table

Here's what you need to know about the noteworthy features of Table component.

Diversity of Content in Table

Offers a wide array of options for the Table Row Cell, including toggles, star ratings, badges, and more. This diversity allows users to present data in a format that best suits their content and design requirements, enhancing the flexibility and functionality of the table.

Table Header with Sorting Icons

The Table Header is equipped with sorting icons, simplifying the organization and presentation of data. Users can easily sort the content based on their preferences, ensuring a streamlined and customizable data viewing experience.

High Customizability

Instead of using columns, the Table Component adopts a row-based design, enabling users to change states effortlessly. This intuitive approach enhances the accessibility and usability of the table, providing a straightforward method for users to manage the states.

COMPONENTS

Table Row Cell

Versatile content container in tables, offering diverse options for data presentation.

COMPONENTS

Table Header Cell

Structural element in tables that organizes and labels data columns, enhancing the clarity of information.

COMPONENTS

Sorting Icons

Visual cues for sorting data in tables, facilitating quick and efficient organization of content.
