

OVERVIEW

Description

The Tooltip component is a valuable addition to your application, offering a simple yet effective way to provide additional information or context to users. Tooltips appear when users hover over or interact with a specific element, offering insights, explanations, or instructions to enhance the user experience. Our Tooltip component is designed to be customizable, allowing you to tailor its appearance and content to match your application's design language. Whether it's for clarifying features, offering hints, or providing brief descriptions, Tooltips offer a valuable tool for making your application more user-friendly and informative.

Significant Features of Tooltip

Here's what you need to know about the noteworthy features of Tooltip component.

Various Tail Placement Options

Users can select from a range of tail placement options, allowing Tooltips to appear above, below, to the left, and many other options. This customization ensures that the Tooltip integrates seamlessly with diverse design layouts.

Size Options

The Tooltip Component offers three size options, including a large size that accommodates more descriptive content. Users can choose the size that best suits their content and design requirements.

Light & Dark Mode

The Tooltip component is available in both light and dark color variants, allowing you to seamlessly integrate tooltips with different visual themes within your application.
